FULL STACK SOFTWARE DEVELOPER

With more than 4 years of ERP development experience and a strong command of Python programming, I am a versatile and quick learner. Strong foundation in the MERN stack (MongoDB, Express, React, and Node.js), as well as practical experience with Flutter and Spring Boot. Competent in creating responsive user interfaces, RESTful APIs, and full-stack web applications.
Quick to pick up new tools and technologies, and very interested in using contemporary development techniques. Devoted to providing scalable, user-focused, and effective solutions and with experience in collaborative Agile-Scrum environments.

Software Engineering • Technical Implementation • Problem Solving • Bug Fixes

Documentation • Requirements Management • Software Development Life Cycles • User Interface Development

Pro. Languages:	Python**,** Java, JavaScript, C#, Flutter
Web:	Express.js, HTML, HTML5, CSS, CSS3, Bootstrap, JavaScript, Ajax, jQuery, XML, Thymeleaf, ReactJS, Material UI
Databases:	SQL Server, MySQL, PostgreSQL, MongoDB
Frameworks:	Spring MVC, Spring Boot, Express.js, Node.js
Web Services:	Json, RESTful
Web/App Servers:	Apache Tomcat, XAMPP Apache
Design Patterns:	Singleton
SDLC:	Waterfall, Agile.
Tools:	Eclipse, IntelliJ, Visual Studio Code, Visual Studio, GitHub, Code Block, VMware, Virtual Box, Cisco Packet Tracer

---

Platforms: Windows, Linux (Ubuntu, kali)

Deployment: Netlify, Vercle, AWS (Self Learn)

PROJECTS EXPERIENCE

ERP Developer (Odoo)
More than four years of Odoo-based ERP development experience, with a strong command of Python. Participated in the implementation and customization of Odoo modules to support accounting, sales, inventory, and human resource management, among other business operations. Knowledgeable about creating unique modules, automating processes, integrating external systems, and utilizing PostgreSQL to maximize database performance. Worked in Agile-Scrum teams on enterprise-level projects in a private business setting, guaranteeing scalable, effective, and user-focused ERP solutions.
Technologies Used:
Python, PostgreSQL, JavaScript, XML, HTML/CSS

College Management System – MERN Stack
Developed a full-stack College Management System using MERN. The system allows admins to manage departments, courses, students, teachers, notices, and exams; teachers to create class schedules, track attendance, and manage exams; and students to view schedules, notices, classmates, and exam details. Implemented JWT-based authentication**,** RESTful APIs**,** and collaborated in an Agile/Scrum team to deliver a fully functional system.

Technologies Used:
React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, Axios, Redux, HTML5, CSS3, REST API, Git & GitHub.

GitHub: https://github.com/Nebajooo/CMS

Ye-Hakim_Ketero – Doctor Appointment System
Developed a full-stack, web-based Doctor Appointment System using React, Node.js, Express, and MongoDB**.** The platform allows patients to register, view doctors, and book appointments, while doctors manage their schedules. Implemented secure authentication and a comprehensive admin dashboard to oversee users and appointments.

Technologies Used:
React.js, Node.js, Express.js, MongoDB, Mongoose, JWT Authentication, Axios, HTML5, CSS3, REST APIs, Git & GitHub.

GitHub:https://github.com/Nebajooo/Hakim_Ketero

Bus Ticket System – MERN Stack
Developed a full-stack Travel Booking System using the MERN stack, enabling users to reserve

tickets and manage travel schedules efficiently. Implemented secure authentication**,** dynamic user interfaces, and backend APIs to handle bookings and schedule management.

Technologies Used:
React.js, Node.js, Express.js, MongoDB, Mongoose, JWT Authentication, Axios, HTML5, CSS3, REST APIs, Git & GitHub.

GitHub: https://github.com/Nebajooo/Kachamale_

Search Engine – Java & Spring Boot
Implemented a semantic search engine using Java and Spring Boot**,** integrating Apache Lucene to enable efficient and advanced text search functionality. Designed the system to handle large datasets and deliver accurate, fast search results.

Technologies Used:
Java, Spring Boot, Apache Lucene, Maven, REST APIs, Tomcat, Git & GitHub.

GitHub: https://github.com/Nebajooo/Lucene_Search_Engine

Student Management System – PHP, HTML, CSS, JS, Bootstrap
Designed and developed a web-based student management system for handling student data, grades, and class information.
GitHub: https://github.com/Nebajooo/Student_Mana

GOJO Real Estate – React.js (Frontend Only)
Developed the frontend of a real estate listing platform using React.js, focusing on modern UI/UX and responsive design.

Technologies Used:
React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, REST API Integration, Git & GitHub.

GitHub: https://github.com/Nebajooo/Gojo_Real-estate

Training Institute
Private project for a training institute – source code is not publicly available.

Technologies Used:
React.js, Node.js, Express.js, MongoDB, Mongoose, REST APIs, HTML5, CSS3, Git & GitHub.

EDUCATION

Master of Science in Software Engineering

HiLCoE School of Computer Science and Technology, Ethiopia

Bachelor Degree From

Mizan-Tepi University, Ethiopia
