PROJECTS

Collage Management System

I built a CMS using the MERN stack, developing RESTful APIs, managing data with MongoDB and Mongoose, and creating dynamic UIs with React.js. I implemented JWT-based authentication and worked in an Agile-Scrum team to deliver key application features. for more check my GitHub

Ye-Hakim_Ketero

Hakim Ketero is a full-stack web-based doctor appointment system developed using React, Node.js, Express, and MongoDB. It allows patients to register, view doctors, and book appointments, while doctors can manage their schedules. The platform includes secure authentication and an admin dashboard. for more check my GitHub
